

## *Absolut Äpple*

*Absolut Äpple was introduced in 2011. The flavor is based on ripen red apple and ginger and in combination with a fruity and naturally sweet taste. It might be the reason behind the instant world wide success.*

*Absolut Orient Apple is made exclusively from natural ingredients, and unlike most other flavored vodkas, it doesn't contain any added sugar. Absolut Äpple is fresh and fruity with a distinct character of ripen red apples with a slight note of ginger.*

*Äpple was renamed from Orient Apple when the bottle was redesigned in 2013, however the vodka remains the same great flavor.*
